TRANSPORTATION MASTER PLAN UPDATE

Why Are We Updating Our Transportation Plan?

Transportation is an integral part of our quality of life here in Blanding. We are striving to work with the community to finalize a plan and build a system that works best for this future community growth.

Blanding City is currently preparing for the Transportation Plan update by reaching out to the community for input and feedback. This plan is being updated to define new route possibilities and set a vision for travel through Blanding that both addresses short-term needs and sets a course for the long term.

Why Do We Need Your Help?

The majority of the plan focuses on the expansion of routes that lay on the western and eastern edges of city limits. We need proporty owners and vested parties to provide feedback to the city, so we can finalize a plan that best aligns with our community needs, and helps us maintain our quility of life.

How Can I Help With The Transportation Plan?

We will host an Open House here at the city office on (TBD). Along with the open house, please visit www.blanding.city/tmp and familarize yourslef with the “Future Roadway Classification” and the “Project Overview”
